

Aims National Curriculum Aims for Key Stage 1 & 2

All Pupils should:

- Develop the creative, technical and practical expertise needed to perform everyday task confidently and to participate successfully in an increasingly technical world
- Build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users
- Critique, evaluate and test their ideas and products and the work of others
- Understand and apply the principles of nutrition and learn how to cook

D&T Year 5 & 6	Year 5			Year 6			
Statutory Curriculum Objectives	A Voyage of Discovery	Expanding Empires	Mediterranean Life	Healthy Habits	Arabian Nights	Powerful Planet	Fortress Plymouth
Outcomes	Bridge construction	Levers- WW2 Themed	Bread making			Bridge construction	Levers- Chinese dragon / puppets
Cooking and Nutrition							
understand and apply the principles of a healthy and varied diet			✓	✓			
prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques			✓	✓			✓
Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.			✓	✓		✓	
Other suggested Content: Understand the importance of correct storage and handling of ingredients (using knowledge of micro-organisms). Measure accurately and calculate ratios of ingredients to scale up or down from a recipe. Demonstrate a range of baking and cooking techniques. Create and refine recipes, including ingredients, methods, cooking times and temperatures.							
Design							
use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups	✓	✓	✓	✓		✓	✓
generate, develop, model and communicate their ideas through	✓	✓	✓				✓

discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design							
<p><i>Other suggested Content:</i> Design with the user in mind, motivated by the service a product will offer (rather than simply for profit). Use prototypes, cross-sectional diagrams and computer aided designs to represent designs.</p>							
Make							
select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately	✓	✓	✓	✓			✓
select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities	✓	✓	✓	✓			✓
<p><i>Other suggested Content:</i> Make products through stages of prototypes, making continual refinements. Materials- Cut materials with precision and refine the finish with appropriate tools (such as sanding wood after cutting or a more precise scissor cut after roughly cutting out a shape, show an understanding of the qualities of materials to choose appropriate tools to cut and shape (such as the nature of fabric may require sharper scissors than would be used to cut paper). Textiles- Create objects (such as a cushion) that employ a seam allowance, Join textiles with a combination of stitching techniques (such as back stitch for seams and running stitch to attach decoration), Use the qualities of materials to create suitable visual and tactile effects in the decoration of textiles (such as a soft decoration for comfort on a cushion). Electricals and electronics- Create circuits using electronics kits that employ a number of components (such as LEDs, resistors, transistors and chips). Computing-Write code to control and monitor models or products. Construction-Develop a range of practical skills to create products (such as cutting, drilling and screwing, nailing, gluing, filling and sanding). Mechanics- Convert rotary motion to linear using cams, Use innovative combinations of electronics (or computing) and mechanics in product designs.</p>							
Evaluate							
investigate and analyse a range of existing products	✓	✓	✓	✓			✓
evaluate their ideas and products against their own design criteria and consider the views of others to improve their work	✓	✓	✓	✓			✓
understand how key events and individuals in design and technology have helped shape the world	✓				✓		✓
Technical Language							
apply their understanding of how to strengthen, stiffen and reinforce more complex structures	✓	✓				✓	✓
understand and use mechanical systems in their products (for example, gears, pulleys, cams, levers and linkages)		✓					✓

<i>Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)</i>							✓
<i>Apply their understanding of computing to program, monitor and control their products.</i>							✓
<p><i>Other suggested Content:</i> <i>Inspiration from History Combine elements of design from a range of inspirational designers throughout history, giving reasons for choices.</i> <i>Create innovative designs that improve upon existing products.</i> <i>Evaluate the design of products so as to suggest improvements to the user experience.</i></p>
